

Grand Opening Ceremony Announced

Sustainable Landscape Supply – December 12th

SARASOTA, FL (December 5, 2008) – Tammy Kovar, owner of Biological Tree Services (BTS), an innovative provider of tree and landscape services, announced the Grand Opening Celebration for the Distributorship of **Sustainable Landscape Supply** (SLS) sister company to BTS to serve the Green industry in the state of Florida.

The reception celebration will be held on Friday, December 12th from 11:00 a.m. till 2:00 p.m. at the new storefront location of the company, 7345 International Place, Suite 107, Sarasota, FL 34240.

SLS is a distributor of a unique proprietary line of biologically-based fertilizer products. These scientifically advanced products build strong root systems that promote a self-sustaining landscape environment, simulating natural ecosystems commonly found in nature.

“Our methods represent a complete break from standard, chemically-based ‘fertility’ practices. The BTS philosophy is based in science,” said Tammy Kovar. “SLS was created to bring this new technology to commercial and residential clients throughout Southwest Florida and beyond. Our objective is to continue to be a leader in landscape trends and make global change one client at a time.”

Kovar also stated: “There was a huge need not being fulfilled”. “The tough new fertilizer regulations in Sarasota County, and elsewhere, limit use of nitrogen and phosphorus during the summer growing season. Almost all conventional fertilizers contain them. We offer products which are 100% compliant with the strict Sarasota County fertility ordinance. The development of these products represents new, innovative tools to safeguard precious natural environments and waterways. We can now assist Sarasota County residents and commercial landscapers with the perfect fertility solution during the summer months.”

We would like to extend an invitation to join us on Friday, December 12th to commemorate the Grand Opening of Sustainable Landscape Supply.
